EASTON GHOST NSA BAT DETAILS

March 2018

The Easton Ghost Fastpitch bat is now available in a BPF (1.20) approved model. This includes USSSA, NSA and ISA.

This is the first and only bat available in the market with the NSA “FASTPITCH ONLY” certification. This means the bat is exempt from all field compression testing in NSA play.

Like the Ghost ASA (98 MPH / USA Softball) model, it is designed with Easton’s proprietary and patent-pending Double Barrel technology.

Due to two separate association testing protocols, each Ghost FP model is constructed specifically to deliver optimal performance for either ASA or USSSA play—not both. This means that the **BLUE** graphic model is approved **only for ASA/USA/ISF and High School play!** And the **GOLD** graphic model is approved for **only USSSA/NSA/ISA play!**

Ghost (**GOLD**) – USSSA (1.20 BPF), NSA, ISA only!

Available in -11 / -10 / -9

Easton Ghost ASA Bat (blue in color shown below) is NOT APPROVED for NSA play!!

Ghost (BLUE) – ASA (98 MPH), ISF only!

Available in -11 / -10 / -9

UPDATED 06/30/2022
